

PROGRAM SUMMARY

The 2023 NSCC Summer Program “International IT Summer School in Croatia” will provide an opportunity for students from all IT programs to travel to Algebra University College in Zagreb, Croatia to participate in a four-week summer program in July 3-28, 2023. The program will consist of a combination of academic sessions, practical workshops, and cross-cultural activities in Zagreb and time spent in Šibenik (on the Adriatic Sea). In addition, this program will also include several site trips and visits to local attractions.

Students will have the opportunity to choose between five course options: Cyber Security, Artificial Intelligence, Data Driven Storytelling, Mobile Application Development and Digital Marketing. . For more information on these opportunities click [here](#).

LEARNING OUTCOMES

- Apply knowledge, skills and attitudes from tasks and projects in an international setting;
- Outline the benefits of cross-cultural collaboration for work-related projects and tasks;
- Build evidence of experiences and new learning (both personal and industry related) for portfolio development and the education of others;
- Assess safety and risk pertaining to international travel to make informed decisions about travelling abroad;
- To identify and reflect on the differences and similarities between Canada and Croatia.
